SOCIAL SECURITY

Provides a system of insurance benefits payable to you and your dependents.

It applies if you are a qualified worker and have been employed for the required length of time in employment covered by the act. Practically all employment is covered by the act except for certain professional work, services performed in the employ of foreign governments, members of the armed forces etc.

BENEFITS PAID

1. Monthly retirement benefits.
2. Supplementary benefits for wives (if over 65 years of age) or for children (under 18) of persons receiving monthly retirement benefits.
3. Survivor benefits paid to survivors of deceased insured persons.

TO RECEIVE MONTHLY BENEFITS YOU MUST BE:

1. 65 or over, and retired.
2. Fully insured.
 - (a) By working a year and a half under social security before reaching 65 or before death if prior to the end of 1954 (wages of \$50 or more are necessary in each six different calendar quarters). Covered work before the effective date of the 1950 law as well as after that date, counts toward meeting the requirements.
 - (b) After 1954, a worker at 65 (or his family in case of his death at any age) may be eligible for new benefit schedule if he has worked at least a year and a half, provided he worked:
 - A. Half that time after 1950 or
 - B. Half that time after he became 21 or
 - C. Ten years in all (in employment covered by the law).
3. Earning \$50 or less a month while in retirement or if over 75 years you may receive benefits regardless of amount of your earnings.

METHOD OF FIGURING YOUR BENEFITS

Under the new law, to figure the amount of your monthly benefit, take 50% of the first \$100 of your average monthly wage, plus 15% of the next \$200. The number of years of work will not affect the amount of the monthly benefit when this formula is used. This new formula will not be used unless the worker is insured on the basis of wages or self-employment income after 1950. When qualifying wages were paid before 1951 the formula in the old law will be used, and the amount of payments will be increased by the table in the law.

Wage credits of \$160 will be given for each month of active service in the armed forces of the United States in World War II.

YOUR PART OF THE TAX

The taxes called for will be paid both by your employer and you. The top limit of wages subject to the Social Security Tax in a year is \$3600. The rate of tax for both you and your employer will be 1 1/2% for 1950-53, 2% for 1954-59, 2 3/4% for 1960-64, 3% for 1965-69, and 3 1/4% for 1970 and after.

Beginning January 1, 1951, self employed people will come under the law for the first time. The maximum amount of self-employment income covered by the law is \$3600 in a year. The tax rate for self-employment income is 1 1/2 times the rate for an employee.

The pages following are to help you keep an accurate record of your employers, and also your earnings for the year taxed for Social Security.

The Series of Books
of Mr. H. H. Smith

SOCIAL SECURITY

Provides a system of insurance benefits payable to you and your dependents.

It applies if you are a qualified worker and have been employed for the required length of time in employment covered by the act. Practically all employment is covered by the act except for certain professional work, services performed in the employ of foreign governments, members of the armed forces etc.

BENEFITS PAID

1. Monthly retirement benefits.
2. Supplementary benefits for wives (if over 65 years of age) or for children (under 18) of persons receiving monthly retirement benefits.
3. Survivor benefits paid to survivors of deceased insured persons.

TO RECEIVE MONTHLY BENEFITS YOU MUST BE:

1. 65 or over, and retired.
2. Fully insured.
 - (a) By working a year and a half under social security before reaching 65 or before death if prior to the end of 1954 (wages of \$50 or more are necessary in each six different calendar quarters). Covered work before the effective date of the 1950 law as well as after that date, counts toward meeting the requirements.
 - (b) After 1954, a worker at 65 (or his family in case of his death at any age) may be eligible for new benefit schedule if he has worked at least a year and a half, provided he worked:
 - A. Half that time after 1950 or
 - B. Half that time after he became 21 or
 - C. Ten years in all (in employment covered by the law).
3. Earning \$50 or less a month while in retirement or if over 75 years you may receive benefits regardless of amount of your earnings.

METHOD OF FIGURING YOUR BENEFITS

Under the new law, to figure the amount of your monthly benefit, take 50% of the first \$100 of your average monthly wage, plus 15% of the next \$200. The number of years of work will not affect the amount of the monthly benefit when this formula is used. This new formula will not be used unless the worker is insured on the basis of wages or self-employment income after 1950. When qualifying wages were paid before 1951 the formula in the old law will be used, and the amount of payments will be increased by the table in the law.

Wage credits of \$160 will be given for each month of active service in the armed forces of the United States in World War II.

YOUR PART OF THE TAX

The Taxes called for will be paid both by your employer and you. The top limit of wages subject to the Social Security Tax in a year is \$3600. The rate of tax for both you and your employer will be 1½% for 1950-53, 2% for 1954-59, 2½% for 1960-64, 3% for 1965-69, and 3½% for 1970 and after.

Beginning January 1, 1951, self employed people will come under the law for the first time. The maximum amount of self-employment income covered by the law is \$3600 in a year. The tax rate for self-employment income is 1½ times the rate for an employee.

The pages following are to help you keep an accurate record of your employers, and also your earnings for the year taxed for Social Security.

SOCIAL SECURITY

Provides a system of insurance benefits payable to you and your dependents.

It applies if you are a qualified worker and have been employed for the required length of time in employment covered by the act. Practically all employment is covered by the act except for certain professional work, services performed in the employ of foreign governments, members of the armed forces etc.

BENEFITS PAID

1. Monthly retirement benefits.
2. Supplementary benefits for wives (if over 65 years of age) or for children (under 18) of persons receiving monthly retirement benefits.
3. Survivor benefits paid to survivors of deceased insured persons.

TO RECEIVE MONTHLY BENEFITS YOU MUST BE:

1. 65 or over, and retired.
2. Fully insured.
 - (a) By working a year and a half under social security before reaching 65 or before death if prior to the end of 1954 (wages of \$50 or more are necessary in each six different calendar quarters). Covered work before the effective date of the 1950 law as well as after that date, counts toward meeting the requirements.
 - (b) After 1954, a worker at 65 (or his family in case of his death at any age) may be eligible for new benefit schedule if he has worked at least a year and a half, provided he worked:
 - A. Half that time after 1950 or
 - B. Half that time after he became 21 or
 - C. Ten years in all (in employment covered by the law).
3. Earning \$50 or less a month while in retirement or if over 75 years you may receive benefits regardless of amount of your earnings.

METHOD OF FIGURING YOUR BENEFITS

Under the new law, to figure the amount of your monthly benefit, take 50% of the first \$100 of your average monthly wage, plus 15% of the next \$200. The number of years of work will not affect the amount of the monthly benefit when this formula is used. This new formula will not be used unless the worker is insured on the basis of wages or self-employment income after 1950. When qualifying wages were paid before 1951 the formula in the old law will be used, and the amount of payments will be increased by the table in the law.

Wage credits of \$160 will be given for each month of active service in the armed forces of the United States in World War II.

YOUR PART OF THE TAX

The Taxes called for will be paid both by your employer and you. The top limit of wages subject to the Social Security Tax in a year is \$3600. The rate of tax for both you and your employer will be 1½% for 1950-53, 2% for 1954-59, 2½% for 1960-64, 3% for 1965-69, and 3½% for 1970 and after.

Beginning January 1, 1951, self employed people will come under the law for the first time. The maximum amount of self-employment income covered by the law is \$3600 in a year. The tax rate for self-employment income is 1½ times the rate for an employee.

The pages following are to help you keep an accurate record of your employers, and also your earnings for the year taxed for Social Security.
